Career Objective

Full Stack Developer skilled in the MERN stack, eager to keep learning and applying new technologies. Motivated to enhance my skills through practical challenges while contributing to real-world projects and team success, with a strong focus on writing clean and structured code.

Skills

Frontend: HTML5, CSS3, JavaScript, React, Tailwind CSS, Redux Toolkit, Next.js, GSAP, shadcn/ui, Socket.io.

Backend: Node.js, Express.js, MongoDB, Firebase, JWT, Stripe

Tools: VS Code, GitHub, Chrome DevTools, Netlify, Vercel, Figma

Soft Skills: Fast Learner, Adaptability, Communication, Creativity, Growth Mindset, Detail-Oriented, Responsibility.

Projects

OneMoreServe - Role Based Food Donation Platform.

[Live Link](#) | [Github \(Client\)](#) | [Github \(Server\)](#)

A full-stack web app connecting food donors with recipients. Implemented secure authentication, real-time restaurant-charity chat using Socket.io, responsive UI, and seamless front-end/back-end integration.

- **Dashboard:** Dynamic role-based dashboard displaying relevant data and actions customized for restaurant, charity, user, admin.
- **Payment Integration:** Enables users to apply for charity roles and make donations securely through **Stripe**, ensuring a safe and efficient transaction process.
- **Real-Time Chat:** Implemented a restaurant-charity real-time chat using **Socket.io**, allowing instant communication between charity and restaurants.

Tech Stack: React, TailwindCSS, Express.js, MongoDB, Firebase, Stripe, Axios, Tanstack Query, GSAP.

ShareWave – A Knowledge Sharing Platform.

[Live Link](#) | [Github \(Client\)](#) | [Github \(Server\)](#)

A full-stack web app for sharing knowledge through articles and discussions. Implemented secure user authentication, dynamic content management, and seamless integration between frontend and backend.

- **Articles & Interactions:** Logged-in users can create, edit, and delete articles, comment, and engage in discussions. Supports category pages and filtering articles by category for organized content browsing.
- **Authentication & User Management:** Secure login and signup system implemented with Firebase, managing user sessions and access.
- **Interactive & Responsive UI:** Built interactive components and responsive layouts to ensure a smooth and engaging user experience with dark/light mode toggle.

Tech Stack: React, Tailwind CSS, Node.js, Express.js, MongoDB, Firebase, Motion, Axios, Framer Motion.

Grandma's Cookbook – A Recipe Exploring Platform.

[Live Link](#) | [Github \(Client\)](#) | [Github \(Server\)](#)

A full-stack web app for managing and exploring recipes with secure authentication, dynamic content management, and responsive design.

- **Recipe Management & Interactions:** Logged-in users can create, update, and delete their own recipes, browse recipes, and filter by cuisine type.
- **Authentication & User Management:** Secure login and signup system implemented with **Firebase**, managing user sessions and access.
- **Interactive & Responsive UI:** Built interactive components and responsive layouts to ensure a smooth and engaging user experience with dark/light mode toggle.

Tech Stack: React, Tailwind CSS, DaisyUI, React Router, Axios, Node.js, Express.js, MongoDB, Firebase.

Education and Certification

Bachelor of Science in Electrical and Electronic Engineering - East Delta University

2019 - 2023

Complete Web Development by Programming Hero | [Certificate](#)

2025

Language

Bangla (Native) | English (Fluent)
